

Fleet Manager by FSI

real issue:

Managing carrier operations or a private fleet in today's business environment is a challenging task for the most seasoned operator. Successful operators have acquired business tools to assist the critical tasks of asset utilization, cost management, driver relations, and customer service.

A powerful transportation management system is the key to a successful transportation business. Optimum utilization of tractors, trailers, and drivers will determine the success or failure of carrier or private fleet operation.

Fleet management software from **Freight Systems Inc (FSI)** provides transportation companies and private fleets with a comprehensive, integrated suite of functions and services to address the end-to-end transportation process – from order entry and dispatch through logistics management and settlement. This product is designed around the core business process of carriers.

The result? An improved transportation management system with superior efficiency. This fleet management software gives you the power to maximize profits, strengthen customer communication and loyalty and enhance driver relationships.

FSI's Fleet Manager enables order entry, creation of loads, viewing available equipment, assigning drivers and equipment, tracking status of trips, developing revenue and expenses, apply notes and instruction, messaging, complete visibility of operations, reporting and more.

FSI's Fleet Manager is easy to use and can be quickly implemented.

- Turn key option including all software, hardware, and training
- Quick start-up
- Affordable with flexible pricing (monthly fee, lease, purchase full license)

REAL Solutions

FSI Fleet Manager focuses on:

Asset Utilization

- View available equipment and drivers
- Assign assets to loads
- Re-assign equipment and drivers
- Track dispatched units

Cost management

- Profit and loss by lane, equipment, driver, and date range.
- Capture all load operating cost
- Reduce costs by scheduling available drivers and units
- Track fuel purchases

Driver relations

- Pre / post-tax deductions
- Calculate & record expenses & advances for pay periods
- Reduce driver questions about settlements
- Easily calculate company driver and owner operator pay by mile, revenue % or free form

Customer Service

- Track driver call-ins, destinations, origins and ETAs
- Provide current unit, trailer, chassis and driver locations
- Provide load notes and messages

Real results

FSI's Fleet Manager enables you to experience real results that impact the operating efficiency of your fleet while improving quality and customer service. Optimum utilization of tractors, trailers, and drivers will determine the success or failure of carrier or private fleet operation.

By selecting **FSI's Fleet Manager** as your transportation management system you can achieve the following benefits.

- *Dramatically simplify the rating and load booking process for your operation.*
- *Track and record driver check calls, origins, destinations and estimated time of arrivals.*
- *Provide quick access to your pending/available loads sorted according to your specific criteria.*
- *Provide a list of available drivers and equipment to make load assignment simple and fast.*
- *Handle multiple stops and drivers, split trips and intermodal container data.*
- *Provide information such as current locations and status for all your drivers and equipment.*
- *Handle all aspects of trailer and equipment tracking.*

FSI's Fleet Manager maintains data base files of customers, shippers, consignees, brokers, drivers, equipment, commodities, product description.

FSI's Fleet Manager has powerful reporting capability.

- Profit and loss (trip, truck, driver, date range, summary)
- Driver pay and commission (income, reimbursement, deductions, review paid and payable)
- Equipment tracking (owned and leased)
